5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

SE1/4 SW1/4 of Section 26, T.33 N., R.56 E., M.D.B. & M., at a point from which the South 1/4 of said
Section 26 bears S 15° 01' 01" E, 414.07 feet.

6. Place of use (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

The SW1/4 of Section 26, T.33 N., R.56 E., M.D.B. & M.

7. Use will begin about January 1 and end about December 31 of each year.
Month and Day Month and Day

8. Description of proposed works (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with pump and motor, etc.)

Drilled well, pipelines to small pond and gravel and sand screening plant with associated office building.

9. Estimated cost of works: \$20,000

10. Estimated time required to construct works: 3 years
If well completed, describe works.

11. Estimated time required to complete the application of water to beneficial use 5 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

The waters under this application are to be used for a gravel and sand screening and washing plant and associated
office. The office will contain one restroom with a sink and a toilet. The water for the screening and washing
plant will be pumped from the well to the plant and then to a small pond approximately 60' x 40' x 3' in size.
The water will be recirculated from the pond to the plant and re-used. The annual consumptive use will be the
waters utilized in the office, the amount of water retained in the aggregates and the waters needed to compensate
for evaporation from the pond. The annual consumptive use is estimated at 4,000 gallons per day.
